FAST PROMPT ENGINEERING FRAMEWORK

Overview

This framework allows AI users to precisely engineering prompts to achieve high quality outputs across multiple AI tools such as Claude and Chat GPT

Framework

Frame your Objective

Clearly state your goal.

Example: "I am working on a progress report for Q4 2024 and would like to summarize our user feedback data in a format that's easy to digest."

Add Context and Examples

Give relevant background info and successful examples.

Example: **Upload last year's report, Upload 2024 raw data points** "You are a data engineer with 10 years of experience leading teams at a fortune 500 company. Using your experience and last year's report as a reference, turn these raw data points into a shorthand summary for our leadership."

Set Parameters

Define requirements and constraints.

Example: "Use concise, accessible language, ensure that report does not exceed 200 words, format so that it can be easily pasted into a slide deck."

Test, Transform and Transfer

Iterate, improve, and save great prompts.

Action: Create a living document with prompts that have yielded great outputs

FAST PROMPT ENGINEERING FRAMEWORK

Text Prompt Sample

Prompt Scenario: You work at a marketing agency and want to create a strategic plan to improve SEO (Search Engine Optimization) for a website that you want to present to a client in a pitch deck.

Bad Example:

“Make a pitch deck for me with a plan improve the SEO of [website].com”

Why it's bad: Although the prompt refers to the specific website and gives a desired output, the prompt above is too simplistic, it lacks specificity, an example of success, and a target audience.

It will likely generate very cookie-cutter language, not clearly targeted at any particular person, or created in the *voice* of any particular person.

Good Example:

Upload pitch deck for previous client

“You are a SEO expert with 10 years of experience in web development and digital marketing at [well known company]. Using your experience and the attached pitch deck as a reference, complete the following steps:

1. Research all pages on [website].com and determine areas for improvement with SEO.
2. Draft a report on areas for improvement
3. Condense this report into a concise, professional language, formatting your output similarly to the attached pitch deck.

Your final output should serve as a compelling pitch presentation for a potential client and help to close the deal. Ask questions for clarification if needed.”

Why it's good: This prompt incorporates each aspect of the FAST framework, giving a clear objective, a successful example (the uploaded pitch deck), clear context (the output is from the perspective of an expert with years of experience pitching to a client prospect), and an opportunity to iterate and improve on the initial prompt by welcome the AI tool to ask clarifying questions.

FAST PROMPT ENGINEERING FRAMEWORK

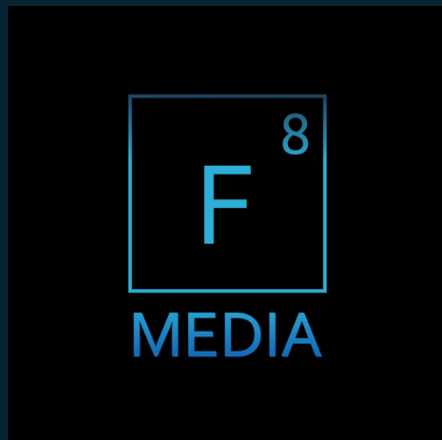

Image Prompt Sample

Multimodal tools for creatives: The most popular AI tools today are text-to-text, but there are many text-to-audio, audio-to-text, text-to-image, and image-to-video tools out there! For some of the more creative tools, you'd prompt them similarly to how a director might articulate their vision for a specific camera shot. But you can also use these tools to make logos, book covers, and other forms of media. The rules of the FAST framework still apply. Uploading samples for the model to iterate on can dramatically streamline your workflow!

Image-to-Image Prompt (ChatGPT):

Output:

Uploads original Fascinate Media Logo

“Remake this logo turning the text into a blue 3D metallic texture with a soft glow, with a metallic sheen on the text”
