AI POLICY ROADMAP

Overview

Below is a step-by-step guide for facilitating student lead co-creation of AI policy in your classroom.

Steps

1. Research Phase - Building Knowledge Foundation

Teacher Tasks:

- Review current AI educational guidelines and ethical frameworks
- Research academic sources alongside fast-paced news sources (podcasts, newsletters)
- Reference "[Free AI Tools](#)" handout for up-to-date AI information
- Create shared repository for findings

Student Tasks:

- Conduct age-appropriate research on AI tools and applications
- Explore both academic papers and current news sources
- Document discoveries in shared class repository

Key Resources:

1. ISTE's AI in Education Resources - Educational guidelines and frameworks
2. Stanford HAI (Human-Centered AI) - Academic research on responsible AI use
3. UNESCO's AI in Education Guidance - Global ethical frameworks

AI POLICY ROADMAP

2. "Blue Skies" Brainstorming with Perspective Tracking

Pre-Debate Activity:

- Students complete "Initial Perspective Survey" documenting their current views on AI in education
- Record specific positions on AI use in different subjects/contexts

Facilitated Discussion:

- Use Socratic method and flipped classroom approaches
- Form subcommittees representing different viewpoints:
 - Pro-Integration Committee: "AI should enhance our learning"
 - Boundary-Setting Committee: "AI needs clear limitations"
 - Ethics Committee: "How do we ensure fairness and integrity?"

Key Discussion Questions:

- What AI tools did you find most compelling?
- How might these change classroom learning?
- What concerns emerged from your research?
- How do we ensure equitable access?

Post-Debate Reflection:

- Students complete "Perspective Change Log" comparing before/after views
- Identify which arguments most influenced their thinking
- Note any shifts in their position on AI use

AI POLICY ROADMAP

3: Student-Led Policy Drafting

Workshop Objective: Each subcommittee creates a comprehensive draft AI policy proposal

Process:

- Subcommittees present research findings and debate insights
- Groups collaborate to draft detailed policy recommendations
- Each draft must address: permitted uses, prohibited uses, attribution requirements, review mechanisms

Teacher Role:

- Facilitate productive discussions
- Ensure policies align with school/district requirements
- Guide toward appropriate academic integrity standards
- Provide feedback on feasibility and comprehensiveness

Deliverable: Each group submits complete draft AI policy for class consideration

AI POLICY ROADMAP

4: Democratic Policy Selection

Voting Process:

- Groups present their draft policies to the class
- Facilitate Q&A sessions for each proposal
- Conduct structured class vote to select strongest policy
- Teacher provides final input and tie-breaking vote if needed

Recognition:

- Award prize to group with winning policy proposal
- Acknowledge innovative elements from all submissions
- Integrate best features from multiple drafts into final policy

Final Policy Elements:

- Clear usage guidelines by subject/assignment type
- Attribution and transparency requirements
- Process for requesting exceptions
- Regular review schedule
- Age-appropriate enforcement mechanisms

AI POLICY ROADMAP

5: Policy Review and Iteration

Timeline: Schedule formal review 3-4 weeks after implementation

Review Activities:

- Collect student feedback on policy effectiveness
- Research latest AI developments and educational guidelines
- Document specific success stories and friction points
- Survey new AI tools students have discovered

Iteration Process:

- Students analyze real implementation examples
- Original subcommittees reconvene to propose amendments
- Class debates and votes on policy updates
- Create "living document" approach for ongoing evolution

Documentation:

- Maintain change log with rationale for modifications
- Track how student perspectives continue evolving
- Build institutional knowledge for future policy updates

AI POLICY ROADMAP

Implementation Tips for Educators

Age Adaptations:

- Elementary: Focus on basic AI concepts, simple rules, reduce debate
- Middle School: Introduce ethical considerations, peer accountability
- High School: Engage with complex academic integrity questions, prepare for college/career

Assessment Integration:

- Use policy creation as authentic assessment opportunity
- Evaluate critical thinking, collaboration, and communication skills
- Connect to standards around digital citizenship and ethical reasoning

Sustainability:

- Schedule regular policy reviews each semester
- Train student "AI policy ambassadors" to help with future iterations
- Share successful policies with other educators and classes
